EXPERIENCE

STOWER

Amazon, Inc/Campbellsville, KY/Jan 2021 - Mar 2021

Responsible for storing merchandise in assorted bin sizes, to be pulled for fulfillment of orders. All items are inspected for damages, then scanned as they are stowed to ensure virtual and physical locations match accuracy of inventory to prevent false overages or true shortages. Speed and accuracy were essential in fulfilling duties and making sure products were available via the website.

TRAFFIC MANAGEMENT OPERATIVE

VOCON Traffic Management/Nottinghamshire, U.K./Jun 2019 - Aug 2019

Duties included installing, maintaining and removal of Temporary Traffic Management equipment such as cones, signs, frames, sandbags and traffic lights on both high and low-speed roads whilst ensuring compliance with the company polocies and the National Highways Sector Scheme. Completion of site maintenance paperwork is also a requirement of this role. Attention to detail is an important, yet necessary skill I continued to develop here.

TRAFFIC MANAGEMENT OPERATIVE

GTM Traffic Management/Nottinghamshire, U.K./Nov 2012 - Mar 2019

Duties included installing, maintaining and removal of Temporary Traffic Management equipment such as cones, signs, frames, sandbags and traffic lights on both high and low-speed roads whilst ensuring compliance with the company polocies and the National Highways Sector Scheme. Completion of site maintenance paperwork is also a requirement of this role. Attention to detail is an important, yet necessary skill I continued to develop here.
